Summary

48 Cedar Springs Drive, Richmond Hill, ON, L4S2B3

[LinkedIn](#) [GitHub](#) [Itch.io](#)

Gameplay Programmer with 3+ years of industry experience and 8+ years of game development practice. Shipped 3 commercial titles, specializing in gameplay systems and UI/UX. Adept at collaborating across disciplines in agile teams and mentoring peers through documentation and onboarding. Winner of *Game of the Year* at Ontario Tech University GameCon. Passionate about creating engaging player experiences and writing clean, scalable code.

Skills

Languages: C#, C++, TypeScript

Engines: Unity Engine, Cocos Creator

Software: Visual Studio, JetBrains Rider, GitHub, VS Code

Technical Skills: Gameplay Programming, UI/UX Implementation, OOP, Source Control, Client-Server Integration, Debugging

Soft Skills: Quick Learner, Work Efficiency, Communication, Agile Development, Cross-Disciplinary Collaboration

Experience

Iron Fox Games / Software Engineer

SEPTEMBER 2023 - AUGUST 2025, REMOTE

- Shipped 3 commercial titles and contributed to many more.
- Implemented core gameplay systems (powerups, boosters, board modifiers, dialogue, animation handling, etc.).
- Built UI/UX features, improving players' gameplay experiences and understanding of gameplay mechanics.
- Collaborated with artists and designers to ensure seamless implementation of assets and ideas.
- Reduced bug backlog using fundamental programming principles and efficient debugging, leading to smoother releases and less pushback from clients.
- Participated in consistent code reviews and scrum meetings, promoting team chemistry and personal growth.

Ontario Tech University / Game Dev Assistant

MAY 2021 - AUGUST 2021 + MAY 2022 - AUGUST 2022, REMOTE, Ontario Tech University

- Designed and developed Unity tutorial projects for incoming first and second year students.
- Recorded in depth video guides to accompany the tutorial projects, teaching game development fundamentals and best practices.
- Supported the Game Development program by creating reusable learning resources for coursework.

Ontario Tech University / University Teaching Assistant (TA)

SEPT 2021 - DEC 2021, REMOTE, Ontario Tech University

- Taught the labs for first year students in the Game Development Workshop course.
- Explained important game development fundamentals through active work and practice using Unity engine.
- Answered questions and assisted students in completing their assigned work from all courses.

Projects

Card Scramble: Viola's Diner (Cocos Creator Web Based - [Gameplay Footage](#))

- Shipped with Iron Fox Games.
- Implemented major gameplay features (Powerups, Board Modifiers, Card Dragging Controls, Dialogue Importing & Parsing).
- Built core systems to integrate backend API including Daily Login, Analytics, and Boosters.
- Collaborated with my team consistently to ensure maximum quality gameplay and user experience.

Branded Private Investigator Game (Unity Web Based)

- Shipped with Iron Fox Games - Not Yet Publicly Available.
- Implemented major gameplay features: Dialogue, Level Progression, Game Clues, etc.
- Collaborated with artists, designers, and engineers to ensure maximum quality gameplay and user experience.

Poker Scramble (Unity Mobile - Early Alpha [Google Play Store](#))

- Developed with Iron Fox Games.
- Implemented core UI systems and UX improvements.
- Build core gameplay systems including level progression and different game modes.

Unreleased Poker Game (Unity Mobile)

- Developed with Iron Fox Games
- Implemented functioning UI and various systems for Animations, UI, UX, Gameplay, etc.
- Worked with the backend to ensure proper communication between server and client.
- Collaborated with artists, designers, and engineers to maximize efficiency and quality of work.

Chibi Champions (Unity 3D - [Itch.io](#)):

- Developed in a team of 5 with a 4 month development timeline.
- Designed and implemented all aspects of gameplay.
- Awarded Game of the Year at Ontario Tech University GameCon.

Project Poultry (C++ Custom Engine - [Itch.io](#)):

- Developed in a team of 4 with a 7 month development timeline.
- Crafted a custom C++ engine using OpenGL and ECS.

Multiple Game Jam Projects ([Itch.io](#)):

- Participated in many game jams with groups of 2 to 5 developers.
- Implemented gameplay mechanics and features under time pressure.
- Collaborated with artists and designers to complete a game vision within 3 days.

Education

Ontario Tech University / Game Development and Entrepreneurship

SEPTEMBER 2019 - APRIL 2023, Oshawa, ON
